Media Release

ClearVue Technologies – Greenhouse update

Perth, Western Australia: 28th September 2015 – Mr. Victor Rosenberg, Executive Chairman of ClearVue Technologies Ltd provided an update to greenhouse proto type.

Mr. Rosenberg commented “the slab is now in place and the frame is now secure. We anticipate that the walls and our ClearVue technology will be attached to the frame quickly with the view to start testing soon thereafter. ”

ClearVue is close to first commercial testing of an agriculture product.

Horticultural Market

The opportunity for ClearVue in horticulture is large. To provide an understanding of the size of the opportunity we invite you to review the Horticulture Case study in the products section of the ClearVue website.

About ClearVue Technologies

ClearVue Technologies is at the forefront of advanced glazing technologies. Using a patented nano technology solution, ClearVue has the ability to generate electricity from a flat sheet of glass whilst maintaining the transparency of the glass.

Our technology presents a paradigm shift in the way glass will be used in building construction, automobiles, agriculture and specialty products. Glass will no longer just be a component of construction, glass now has the potential to be renewable energy resource.

Our Vision – We see a world where consumers are part of the energy solution.
