

## Media Release

# ClearVue Technologies to join CAPS initiative in Sydney

**Perth, Western Australia: 3<sup>rd</sup> April 2016** – Mr. Victor Rosenberg, Executive Chairman of ClearVue Technologies Ltd is pleased to be involved in the [Climate Adapted People Shelter \(CAPS\)](#) initiative.

Participating stakeholders include [UTS](#), [Ashfield LGA](#), [Parramatta LGA](#), [Sydney Buses](#), [AdShel](#).

We maintain our priority of pragmatic entrepreneurialism; our Mission is to improve living standards by applying our core IP of “solar glass”.

The CAPS initiative enables us to learn about the effects of global warming on:

- public bus transport commuters,
- communities (urban design),
- the vulnerable demographics in our communities who depend on public transport.

Key take outs include the design of bus shelters. These are critical public transport infrastructure components in virtually all developed and emerging economies.

At this time we are envisaging a bus shelter which utilise Clearvue glass for roofing. That will generate enough electricity in most cases to power fans, an LED display, etc. and still achieve a payback period < 15 months.

A Summary Brief is available upon request and updates will become available in due course.

## **About ClearVue Technologies**

ClearVue Technologies is at the forefront of advanced glazing technologies. Using a patented nano technology solution, ClearVue has the ability to generate electricity from a flat sheet of glass whilst maintaining the transparency of the glass.

Our technology presents a paradigm shift in the way glass will be used in building construction, automobiles, agriculture and specialty products. Glass will no longer just be a component of construction, glass now has the potential to be renewable energy resource.

Our Vision – We see a world where consumers are part of the energy solution.
